

AVERAGE WEEKDAY RAIL BOARDINGS

The following tables display average weekday ticketed NJ TRANSIT passenger boardings by line and rail station. This report deviates from the regular Average Weekday Boardings report due to the importance of tracking COVID impacts to ridership and the state of our rail system's recovery. For that reason, this report will be updated on a quarterly basis.

NJ TRANSIT implemented a fare holiday, in which no fares were collected, from August 26 – September 2, 2024. Being that rail statistics rely on ticket sale data and their associated trips, the fare holiday resulted in a gap in data due to the lack of sales. The Q1 FY25 update was developed using a conservative ridership estimate for the fare holiday week, which took into account the average weekly ridership preceding the event as well as seasonal fluctuations in ridership for previous years.

*NJ TRANSIT Passengers transferring between trains are not counted twice in these station tables (a Princeton to NY Penn ticketed trip requiring a transfer at Princeton Junction appears as a Princeton boarding, not both Princeton and Princeton Junction).
